ASL941B-56-R	Standalone Lockset (RH) with Straight Lever
ASL954	Cards /100

ASL941B Range OnDoor Be-Tech MIFARE™ Standalone Lock

Programming Operation;-

- 1. Initialisation:** There is a small button on the PCB in the front escutcheon. With the lock connected and the batteries in, press this for 3 seconds. There will be 3 beeps with a green light. All cards will be deleted including the owner card.
- 2. To program the owner card:** Offer the first card to the lock. There will be 3 beeps. There is only one owner card.
- 3. To program a user card:** Offer the owner card to the lock twice. There will be 1 beep and the green light will flash. While the green light is flashing you can offer new user cards to the lock. 1 beep means it has been accepted, 3 beeps means the capacity is full.
- 4. To delete a user card:** Offer the owner card to the lock twice. There will be 1 beep and the green light will flash. While the green light is flashing you can offer the card to be deleted. There will be 2 beeps with a red light. **N.B User Cards will only enrol with the deadbolt retracted. If the deadbolt is thrown the product will only allow a Owner Card to be programmed or allow for the unit to be Reset.**
- 5. To delete all user cards:** Offer the owner card to the lock 3 times. There will be 3 beeps.
- 6. To enable passage mode:** Turn the mechanical key all the way anti-clockwise and then return it to the insertion position. There will be one beep and the green light will be on. Offer the owner card. There will be 1 beep and the green light will go out.
- 7. To disable passage mode:** Turn the mechanical key all the way anti-clockwise and then return it to the insertion position. There will be one beep and the green light will be on. Offer the owner card. There will be 2 beeps and the green light will go out.
- 8. To set the lock to passage:** When in passage mode either 1. offer any card, there will be 1 beep and a green light offer any card or 2. throw and withdraw the dead bolt.
- 9. To lock the door from passage:** When in passage mode either 1. offer any card, there will be 2 beeps and a red light or 2. throw the dead bolt.

When the dead bolt is thrown the red light will flash every 3 seconds.
- 10. Low battery warning:** The lock will beep 8 times to indicate that the batteries need changing when operating the lock.
- 11. Illegal card alarm.** The lock will beep for 60 seconds if an un programmed card is offered 4 times.
