

Terminus3

The Terminus3 software is written to work exclusively with the; Entra+, Tower, Integra and upgrade Excelsior access control systems. The package provides system managers with a powerful, easy to use tool to manage both Access Control and Building Management from one package.

Terminus3 can be easily added to existing systems to provide real time onscreen card transaction, alarm control and monitoring.

Reports Available

- Alarms
- Door usage
- Events
- Events by category and cardholder
- Hours worked (current cardholders)
- Hours worked daily (First IN, Last OUT)
- How many different people use a door in a day, a week, a month etc.
- System maintenance alarms

In addition to the standard reports listed, customer reports can either be created by the end-user or on request can be created by Securefast IET Ltd.

Features & Benefits

- Real time display and tracking of alarms and transactions
- Dial up support module for remote sites
- Temporary, blocked and banned card functions
- Automatic roll call by area
- Emergency lockdown feature
- Local displays of the cardholders photo for visual confirmation
- Automatic holiday schedules and daylight savings changes
- Automatic Fire alarm link which includes; the unlocking/locking of doors and the printing/emailing of the roll call
- Controls and monitors building management systems
- Existing Wintacs/Domain access control and time and attendance software databases can be converted to the client/server data base engine used by terminus
- Easy graphical display and set up of system configuration
- Multi-level, timed anti pass-back (Entra+ only)
- Automated backup
- Alarm triggered emailing/printing of reports
- Area counting such as with car parks (option, only on Integra systems)
- Integration with Kone & Otis lift systems (access control of other lifts provided with BMS board)

Terminus3

Technical Information

Connection to Access Control System

- Via software dongle supplied with 3 meters of cable and a 25 to 9 way adapter
- Additional access control networks may require a multiport comms card for the PC or a LAN adapter module at the remote (ACU) end. Radio, dial-up, or leased line modems may also be used if no LAN resources are available
- Ready programmed modems and comms cards are available

Terminus Operators

- Unlimited PC operators
- Unlimited configurable operator types (Logon levels)
- Multi-tenant logons
- Monitor screen configurable for different operator types

Computer Requirements

- Windows 7 or later
- Minimum 2Gb RAM
- At least 100Gb free disk space

Software Maintenance

Regular upgrades are available from Securefast
