

F7000-B-T Securefast Universal Door Entry Kit

The Securefast Universal Door Entry system offers both hardwired and Wi-Fi (2.4Ghz) direct connection to your mobile phone.

The system allows the door to be opened from your indoor monitor or mobile phone with the added advantage of remote unlocking of the door. This easy to install system offers a weather resistant door camera with call button and a slimline 7" touch screen monitor. Install a Micro SD card and you are able to record both visitors and motion detection when you are not around.

The door camera is IP65 rated and includes a PIR for motion detection and security.

For ease of access we offer AMUI-F 1K Classic Mifare Fobs.

When ordering do not forget to purchase your Deadlock locking device to enable remote unlocking
