

Key Switches

Key switches are ideal for a member of authorised personnel to control power to a device, such as an electric lock or access control system.

A series of key operated switches offering maintained or momentary switching, surface or flush mounted and euro profile cylinder type, euro profile options will require a single cylinder. (SEU6402 40mm Single Cylinder to be ordered separately).

Features & Benefits

- Functional design is easy to operate
- Voltage free contacts
- NO/NC contacts > 1 Million operations
- Etched Legend
- Security screws
- Easy clean surface (Ideal for hospitals & public areas)

Momentary

Term used for switches – means the switch will change from on to off only while the switch is pressed/turned.

Maintained

Term used for switches – means the switch will remain in either the on or off position when operated.
