In 2024, the CQR brand and product platform verticals have undergone significant evolution.

CQR are a globally recognised manufacturer of ancillary devices and specialist cables for Intruder and Access Control systems. We ensure that your system is equipped with the highest quality components for ease of installation, dependability, and security.

Since 1978, CQR has been manufacturing Intruder products and equipment from our Wirral, UK facility. We have solidified our position as the leading manufacturer of Intruder and Data specialist cables that adhere to global market specifications, including a full range of compliant construction product, regulation approved cables.

Our product platform has expanded to include contacts, sounders, hold-ups, and call points, providing a trusted solution for system installers across a wide range of applications. From small domestic to heavy commercial and high-security environments, CQR products have been instrumental in ensuring the safety and security of buildings across commercial, educational, and government institutions.

OUR BRANDS:

CQR – INTRUDER | CABLE

DEEDLOCK – ACCESS CONTROL

SECUREFAST – MECHANICAL LOCKING

JOINING FORCES

In 2022, OSL Group the parent company of CQR, identified Securefast Plc as a strategic opportunity for growth.

An ideal acquisition to bolster the Groups Security Division, Securefast represented a company aligned in its values and reputation for quality products, expertise and specialist product categories. With extended product categories of Access Control and Mechanical Hardware the CQR brand is positioned to become a leading solution provider in the Intruder and Access Controls market.

Securefast predominantly consisted of two brands;

A brand synonymous with Access Control products, industry known for their market leading specifier range of Electro-Magnetic Locks and Electric releases.

A product brand clearly visible in our leading healthcare, government and defence buildings, ensuring dependability for high traffic and high security environments.

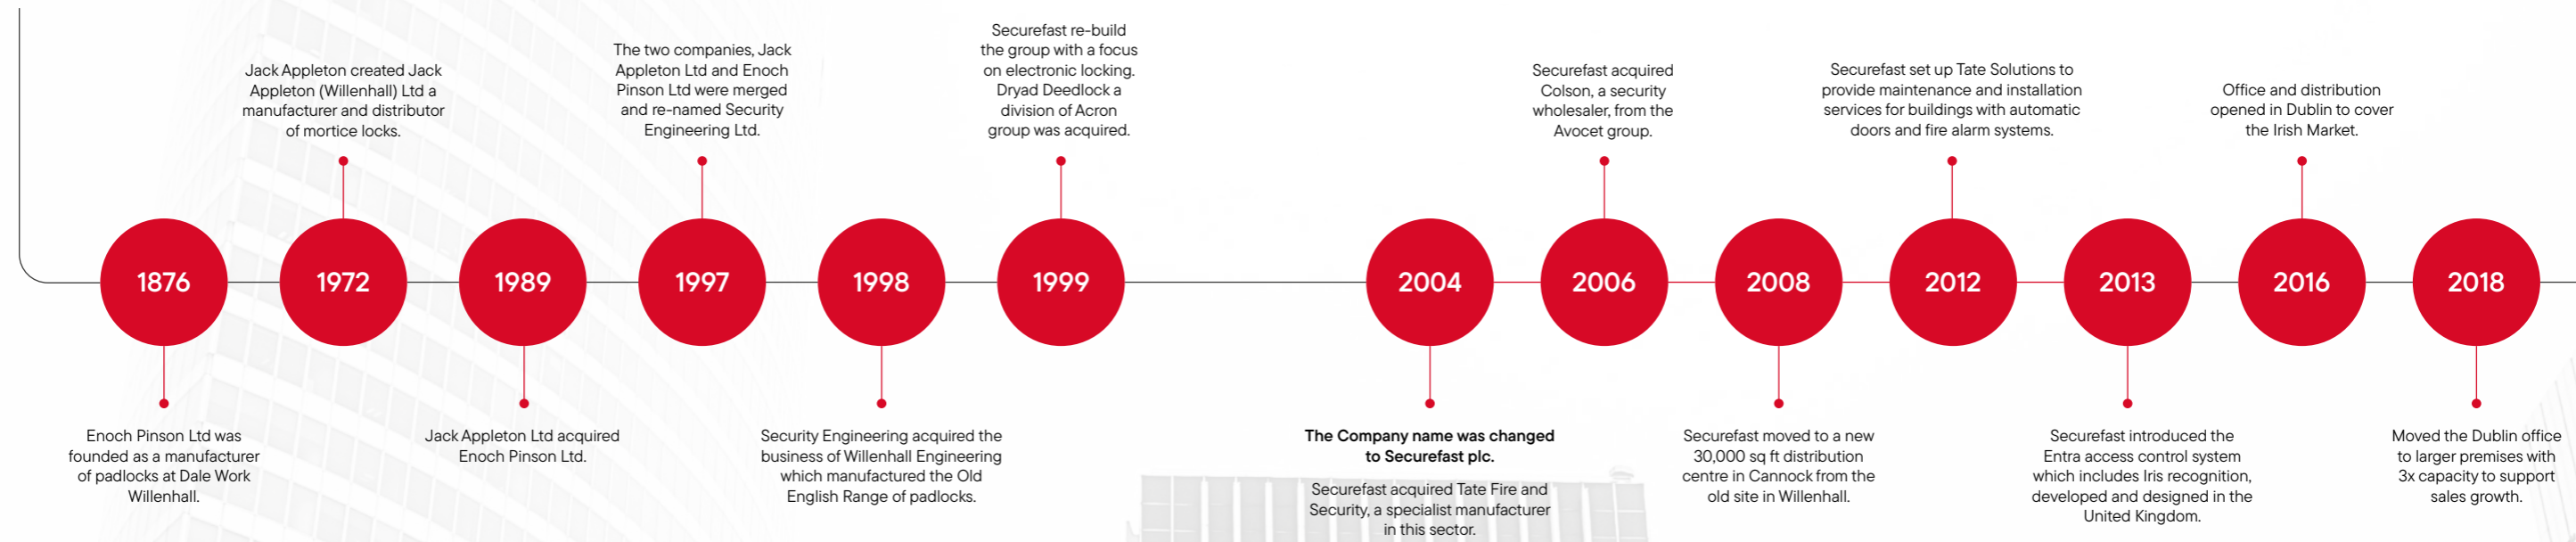

Mechanical hardware is the core strength of the Securefast brand, a trusted name heavily present within architectural ironmongery and door manufactures.

The product portfolio of panic hardware, mechanical digital locks and locking systems provides a dependable range of high-performance product used across high traffic environments in healthcare, education, and government buildings.

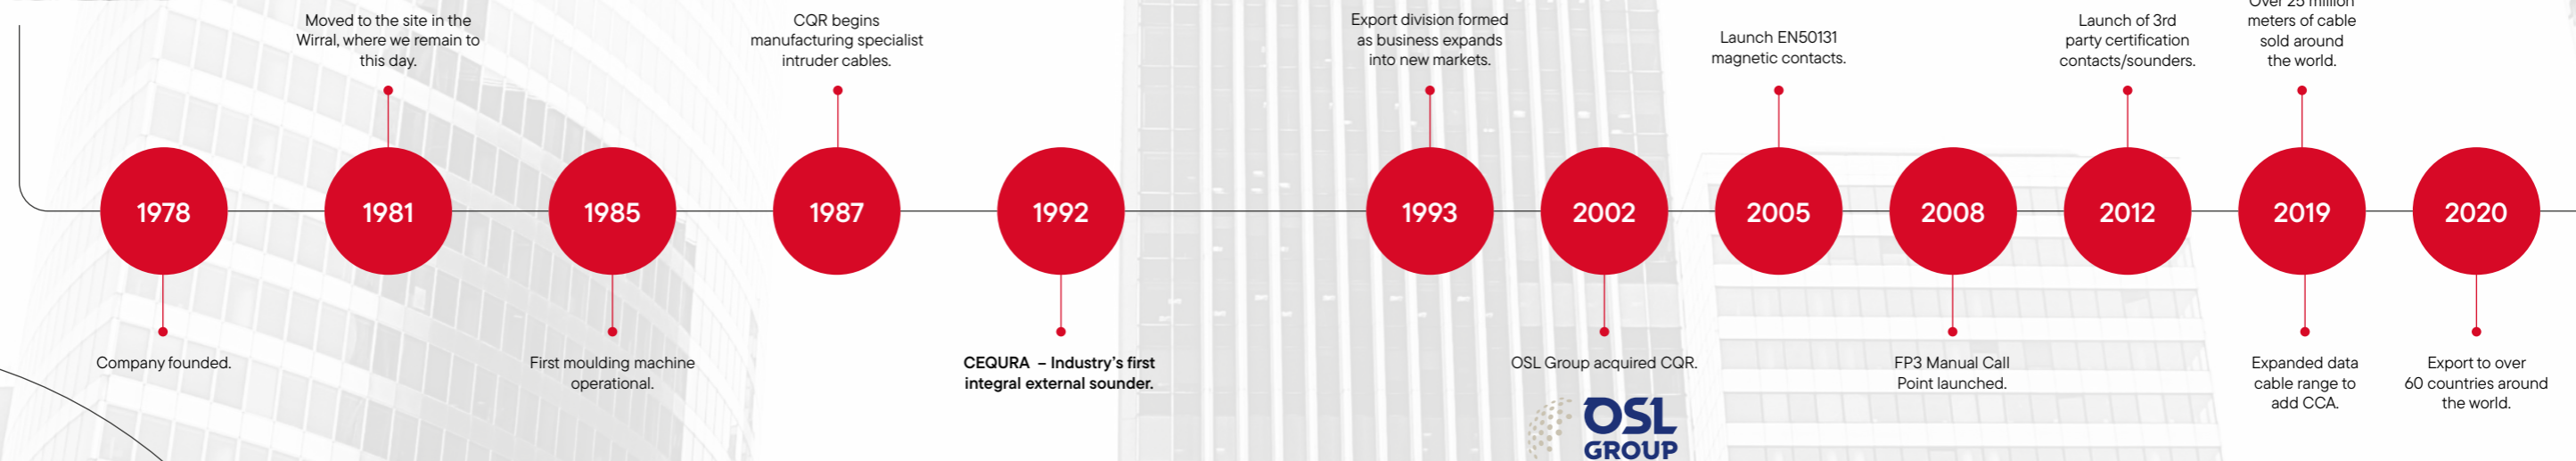

Proud of our heritage -
prepared for the future.

Securefast

CQR

Years of Excellence

CQR have a strong history dating back to 1978 and have been a pivotal manufacturer in the development of the Intruder industry over the last 45 years.

Market changing products such as the Cequra External Sounder innovated the market, with a product offering much easier to install and with a significantly smaller footprint than any other in the market.

2023 Securefast/
Deedlock brands
merge with CQR.

2022

2023

Sheffield based
manufacturer OSL
Group acquired
Securefast Plc.

CQR are part of the OSL Group. OSL are a group of British manufacturing businesses operating across the Intruder, Access Control, Automotive and Power tool markets, headquartered in Sheffield, England.

In 2024 CQR bring to market two new sub brands representing the very best of a 150 year legacy, to complement our existing Intruder and Cable offering. Deedlock and Securefast offer our customer new possibilities within Access Control and Mechanical Hardware Solutions to support our vision of creating a safer and more secure world one building at a time.

OUR VISION

Empower the potential to create a **safe and secure world**, one building at a time.

Intruder

Protecting Built Environments Across 60+ Countries

Intruder systems are designed to monitor and detect the unlawful entry to buildings.

CQR is the industry-leading manufacturer of core ancillary devices for intruder systems. Our products meet and exceed industry grading requirements, ensuring the critical security of buildings, ranging from domestic to high-security commercial premises across government, banking, and accommodation applications.

Our intruder range provides comprehensive solutions for installers to secure their clients premises efficiently and effectively. The range is designed to reduce the number of products the installer needs to carry in their van, enabling them to tackle a project with a single item, offering multiple possibilities. Our multi-resistor door contacts comes in both slimline and standard profiles for surface, flush, and roller shutters allowing installers to carry one product to service multiple system types.

Our sounder range offers easy installation with switchable sounder and speaker in one for both internal and external use. The Alto works for internal installs, while the Multibox is designed for external installs with switchable covers that allow for fitting in confined spaces and larger commercial properties.

Our intruder products ensure dependable security and ease for every site.

OUR INTRUDER PRODUCT GROUPS:

1. **MAGNETIC CONTACTS**
2. **INTERNAL SOUNDERS & SPEAKERS**
3. **EXTERNAL SOUNDERS**
4. **PANIC BUTTONS**
5. **SHOCK SENSORS**

Scan the QR code to see our full range of Intruder products.

1. Magnetic Contacts

Magnetic contacts are sensors with magnets that let a system know whether a door or roller shutter is open or closed.

- Available as surface, flush, heavy duty or roller shutter types.
- Products in the range suitable from non-graded to Grade 3 systems
- Available with selectable resistors pre-configured or fit your own
- Low profile, Plastic and Aluminium material compositions available
- Spacers and pre-wired versions available across the range

2. Internal Sounders & Speakers

Internal sounders and speakers are audible devices used to provide a clear notification to everyone on the site of an event on the connected system.

- Available as sounders, speakers, combined sounder speakers and sounders with LED notification
- Products in the range suitable from non-graded to Grade 3 systems
- Fixed and Selectable tones with separate input options available
- Multiple lens colours available

3. External Sounders

External sounders are audible and visual devices used to display externally a clear notification of system state, whether alarm, fault or comfort.

- Available screen-printed with multiple cover design styles to suit specific applications
- Single and twin piezo sounder versions available
- Products in the range suitable from non-graded to Grade 3 systems
- Multiple colour options available for backplates and cover designs

4. Panic Buttons

Panic buttons are electronic system devices which are pushed either with single or double activations to alert for attention and cause system activation.

- Available as Single and Double push buttons
- Several materials and finishes available per requirements
- Products in the range suitable from non-graded to Grade 3 systems
- Hush button solutions for highly discreet notifications
- Grade 3 compliant two stage activation devices available

5. Shock Sensors

Shock sensors are electronic devices which indicate if a physical impact or shock has occurred and then notifies the system.

- Surface and flush mounted options available in multiple sizes for individual applications
- Mass inertia, Analysers and Trapper ranges available
- Products suitable for non-Graded to Grade 2 systems
- Time pulse integration systems for analysers
- Products suitable for use in Cash dispensers, Slot Machines and Commercial windows and doors

Scan the QR code to see our full range of Magnetic Contacts.

Scan the QR code to see our full range of Internal Sounders & Speakers.

Scan the QR code to see our full range of External Sounders.

Scan the QR code to see our full range of Panic Buttons.

Scan the QR code to see our full range of Shock Sensors.

ALTO

- Low Profile internal sounder and speaker
- 50% smaller profile than all other competitor products
- Available as speaker or sounder only and as a speaker / sounder combined
- Powerful 110 Db (A) sound output
- Selectable alternating or continuous tone
- Low current consumption
- High Impedance allowing multiple speakers to be used

Scan the QR code to see more information on the ALTO.

SC517 MULTI SURFACE CONTACT

- Slimline and compact design door contact for minimal impact
- Selectable end of line resistors for multiple panel systems
- EN50131-2-6 Grade 2 or Grade 3
- Microswitch tamper
- Can be used on double door configurations
- Screw terminal block, no junction box required

Scan the QR code to see more information on the SC517 Multi Surface Contact.

PICCOLO

- Low profile design sounder with LED visual indication
- Powerful 115Db sound output
- Available with red or blue lens
- Low current consumption
- Flashing alarm indication
- Selectable alternating or continuous tone
- Grade 3 Environmental Class II

Scan the QR code to see more information on the Piccolo.

Access Control

Convenient and Reliable Access, ensuring safety and security

Access Control systems are created to regulate entry and exit throughout buildings, tailored to specific requirements dependent upon the sensitivity of each site. Deedlock by CQR is our sub-brand dedicated to electrical hardware, standalone, and networked access control products.

Our product range has evolved over three decades, to provide comprehensive solutions to meet the needs of Access Control Installers and end user applications. Our design teams collaborate with world-leading door manufacturers, integrators, and installers to produce application-specific ranges to overcome customer challenges. Our products are designed to simplify installation and maintenance for installers. Deedlock electronic release and access control kits offer convenience for the contractor to complete any access control project, whether it is a new installation or retrospective.

Knowledge and expertise

In the Education sector, we have leveraged our knowledge and expertise partnering with leading facilities management teams ensure product performance. Our Deedlock range of Electro-Magnets, have undergone rigorous and extensive cycle tests to ensure best-in-class performance and longevity of life in high-traffic environments.

OUR ACCESS CONTROL PRODUCT GROUPS:

1. **ELECTRO-MAGNETIC LOCKS**
2. **ELECTRIC RELEASES**
3. **KEYPADS & READERS**
4. **ELECTRIC LOCKS & SOLENOID BOLTS**
5. **EXIT BUTTONS**
6. **MANUAL CALL POINTS**
7. **POWER SUPPLIES**
8. **ACCESS CONTROL SYSTEMS**
9. **ACCESS CONTROL ACCESSORIES**
10. **HOME SECURITY**
11. **HOTEL LOCKING**
12. **SPECIAL NEEDS EQUIPMENT**

Scan the QR code to see our full range of Access Control products.

1. Electro-Magnetic Locks

Electro-Magnetic Locks are electrified locking devices which consist of an electro-magnet and an armature plate to lock a door when powered up and then released by a device such as a push to exit button or keypad.

- Micro / Midi / Slimline / Standard / Shear / Mortice / External / Cabinet & Pro ranges provide a market leading comprehensive and performance range
- TS010 performance technical standard
- Fire Rated for use on Timber Doors to EN1634-1
- Extensive range of brackets to ensure the correct fit for every Electro-Magnet door configuration
- All magnets fitted with Deedlock by CQR kick-off pin in the armature plate to overcome residual magnetism when power to the magnet is off

Scan the QR code to see our full range of Electro-Magnetic Locks.

2. Electric Releases

Electric Releases are an electrified locking device fitted into the internal of the door and frame which uses electric to move the latch and unlock or lock door.

- 12V and 24V AC and DC options available
- Fail locked or fail unlocked options with monitoring available
- Can be used for inward or outward opening doors
- Fire rated for 30 and 60 minute timber doors available
- Extension lips available for different retrofit and new installation projects

Scan the QR code to see our full range of Electric Releases.

3. Keypads & Readers

Keypads and readers allow for either key-coded PIN entry or the use of a proximity reader with a card or fob to enable access throughout a building.

- Keypad and proximity combined units are available.
- Devices with up to 10,000 maximum users
- 12-24 AC/DC & 12V DC available
- Chrome, Black ABS Plastic, Polished Chrome & White Plastic designs
- IP65 & IP66-rated versions available for external use
- 125 MHz EM & MiFare compatible options

Scan the QR code to see our full range of Keypads & Readers.

4. Electric Locks

Electric locking products are available in two variations, solenoid or motorised types. They are designed to provide controlled access through a door in one or both directions by controlling the operation of the locking bolt. Unlike electric releases which are a combination of a mechanical latch and an electrically controlled striker.

- Higher holding forces than other electric locking products
- Available fail-unlocked and fail locked
- Surface housing kits available
- Single-action and double action available
- Available for swing and sliding doors
- Many of the solenoid bolts can be fitted in the header or door jamb
- Solenoid bolts are 12V DC
- Motorised locks are available 12 / 24V DC

Scan the QR code to see our full range of Electric Locks.

SLIMLINE ELECTRO-MAGNETIC LOCKS AEM100 RANGE

- Slimline design with 12V/24V selectable on-site
- Monitored and Un-monitored versions available
- Market leading holding force annually benchmark tested
- TSO10 tested to performance technical standards
- Fire rated for use on timber door to EN1634-1
- Kick Off Pin in the armature plate to overcome residual magnetism
- Multiple bracket ranges available for door requirements

Scan the QR code to see more information on the Slimline Electro-Magnetic Locks AEM100.

APX16 KEYPAD

- Compact Standalone keypad
- Suitable for up to 1200 users
- Supports digital pin with optional proximity cards
- Back Lit for use in low light conditions
- 12-24AC / DC & 12V DC
- IP65 Rated

Scan the QR code to see more information on the Deedlock APX16 Keypad.

FP3 ACCESS CALL POINT

- Manual call point with highest market specification as standard
- Available in Double Pole, Triple Pole & with Buzzer
- LED notification as standard – no extra option
- Resettable or non-resettable as standard – no extra option
- Includes backbox as complete unit
- Easily compatible with most access control systems

Scan the QR code to see more information on the Deedlock FP3 Access Call Point.

5. Exit Buttons

Exit buttons are often referred to as RTE's (Request to Exit Buttons) their function is to release a locking device from the non-secure side of the door. Once the exit button is activated the door can be released and then relocks on closure.

- Available in multiple sizes with stainless steel and white plastic
- Touch free range available: Ideal for hygiene essential environments
- Backlit options available
- Domed version available
- Various legend design types such as Press to Exit / Exit / No Touch
- Flush mounted or multiple backbox options available
- Single gang & Architrave designs

Scan the QR code to see our full range of Exit Buttons.

6. Manual Call Points

A Manual call point (MCP) also known as a break glass unit is a means of releasing a locking mechanism from the door in an emergency often used on access control and fire systems, along with gas supplies and water shut offs. Following activation of a MCP they are reset using a special key.

- Available as red single pole EN54 approved for conventional fire systems
- Available in green for access control systems as Single, Double and Triple Pole
- Glass and Resettable elements supplied as standard
- High visibility LED as standard
- Transparent covers available to prevent accidental operation
- Backlit versions available

Scan the QR code to see our full range of Manual Call Points.

7. Power Supplies

A Power supply unit (PSU) converts mains AC to low voltage regulated DC power for use with electrical products such as electro-magnetic locks, electric releases, access control, CCTV and Intruder alarm systems.

- 12v and 24v DC available
- Various amperes from 1A to 10A available
- All Switch Mode as standard for ultra-low power consumption
- Multiple box sizes available for different battery support sizes
- Graded range for Intruder Systems available
- Fused splitter outputs available for CCTV applications

Scan the QR code to see our full range of Power Supplies.

8. Access Control Systems

Access control systems are available as standalone systems for individual doors or networked systems. Dependant on site requirements, our access control systems can facilitate singular or multiple doors solutions.

- Entra Plus Networked system available for infinite number of users designed for the healthcare sector sites such as Hospitals
- Entra Plus system supports all major readers including HID™ / MiFARE™/ Innoprox™
- Entra Plus controllers have RTE, Door Contact, Auxiliary output and lock output
- Free Entra Plus software managed and support by a dedicated UK support team
- Single door kits available with either keypad or proximity reader and electro-magnet or electric release

Scan the QR code to see our full range of Access Control Systems.

TOUCH FREE EXIT BUTTONS

- Hygienic 'no touch' operation
- Illuminated sensors
- Flush or Surface mounted
- Push plate and architrave options available

Scan the QR code to see more information on touch free exit buttons.

ENTRA+ ACCESS CONTROL SYSTEM

- Available as 1, 2, 3 or 4 door controllers
- Each door allows up to 25,000 cards holders
- Designed for high traffic areas and large commercial sites
- Free software with dedicated UK technical support team
- Support all major readers for easy system integration

Scan the QR code to see more information on Entra+.

IP66 RATED EXIT BUTTONS

- IP66 rated to provide protection against ingress of dust and strong jets of water
- Available in multiple colour options for individual applications
- Multiple text options available for Gate / Door / Pool / Panic and emergency locations
- Twist and push button options available

Scan the QR code to see more information on the IP66 Rated Exit Buttons.

9. Access Control Accessories

Access Control accessories are ancillary devices to support access control equipment such as door loops and spare fobs and cards.

- Range of Door Loops for concealed or surface mounted operation
- Door loops allow the transfer of power from the frame to the door safely
- Door loops suitable for single and double doors
- Relays for enabling switch currents from 12V to 230V using 12/24 Signal

Scan the QR code to see our full range of Access Control Accessories.

10. Home Security

Home security products offer simple installation of doorbell and camera systems for domestic dwellings operated via our application software for viewing on a mobile device.

- Range includes video doorbells, internal and external cameras and universal door entry kits
- Two-way communication via mobile applications
- PIR motion detection
- Infa-Red night time vision
- Simple plug and system solutions for domestic installations

Scan the QR code to see our full range of Home Security.

11. Hotel Locking

Lock sets are locking systems which use RFID (Radio Frequency Identification Devices) typically used in locations such as hotels and office spaces which are battery operated and can be stand-alone or networked, which allows door entry via a proximity fob or card to guests.

- Available as in-door with the electronics morticed into the door
- Available as on-door with the electronics surface mounted in the lock set
- Available with Bluetooth integration and mobile app
- Stainless steel finish as standard
- Uses 4 X AA batteries with low battery warning for easy system management

Scan the QR code to see our full range of Hotel Locking.

12. Special Needs Equipment

A dedicated range of equipment for the RADAR™ system which allows users to enter toilets freely with the option of connection to an electronic door opener.

- Fully locks from the inside for user privacy
- External indicator for when the door is locked
- Kit includes indicator lights, electronic lock, internal controller and RADAR™ key
- Toilet alarm system includes control panel, pull cord, indicator and alarm panel

Scan the QR code to see our full range of Special Needs Equipment.

VIDEO DOORBELL WITH INDOOR CHIME

- Six months stand by battery life – no need for hard-wiring
- High-Definition Video and Two-Way voice calls
- Built in Infa-red LED support for night vision
- App connectivity for user access and visibility

Scan the QR code to see more information on the Video Doorbell with Indoor Chime.

UNIVERSAL DOOR ENTRY KIT

- 1 way video door entry system with monitor and application connectivity
- Remotely view and release up to 2 X locking devices such as an electric release or mag locks
- PIR motion detection with IP65 rated door station
- Ideal for small commercial or domestic dwellings

Scan the QR code to see more information on the Universal Door Entry Kit.

IN DOOR HOTEL LOCKING SYSTEM

- Internal virtual networked lock set for use in hotels, offices and student accommodation
- PCB electrics are morticed into the door edge
- Brushed Stainless Steel Hardware as standard
- Optionality to change for your own handle sets
- Fire rated for FD60 Timber Doors
- Available with Bluetooth™ connectivity
- Inside lever handle allows single action egress

Scan the QR code to see more information on the In Door Hotel Locking System.

Cable

Specialist Cable Manufacturing at the heart of what we do

Specialist cables are a requirement for use in the installation of intruder alarms, gates, barrier systems, and access control installations. The installation process is the primary cost driver for security systems, and the careful selection of cable type and quality is paramount to ensuring system integrity and optimal performance.

We are proud to have been manufacturing specialist cables for over 45 years at our dedicated UK facility in Moreton, Wirral. Our Construction Product Regulation (CPR) and Euroclass Rated Cables are designed to meet the requirements of a variety of installations, including large domestic, commercial and high-integrity systems such as those found in Defence, Healthcare, and Banking.

Our range of Professional Cable is designed to set the industry benchmark, providing market-leading levels of low resistance, core strength, and ease of stripping. Available in PVC/Low Smoke and Fume and Low Smoke Zero Halogen variants, ensuring compliance with even the most sensitive of installation requirements.

We are committed to expanding our specialist cable range to meet the increasing needs of our customers, with Belden equivalent style cables for data and access control, along with twisted pair cables, flame retardant and power & data options.

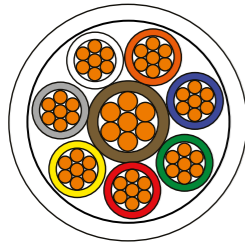

CQR's cable platform places quality assurance in the hands of the installer to meet the needs of every access and security every application.

OUR CABLE PRODUCT GROUPS:

1. **PROFESSIONAL INTRUDER CABLE**
2. **CCA INTRUDER CABLE**
3. **BELDEN EQUIVALENT CABLE**
4. **POWER & DATA CABLE**
5. **TWISTED PAIR CABLE**
6. **FLAME RETARDANT CABLES**

Scan the QR code to see our full range of Cable products.

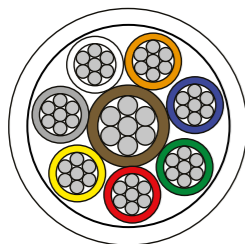

1. Professional Intruder Cables

High performance ultra-low resistance professional intruder copper cable designed for large domestic and commercial system installations.

- PVC & LSZH Insulations and Sheathing Available
- Also available in PVC Low smoke and fume (LSF) & Screened
- Available in 2 -12 cores - 7 x Strands copper conductor
- BS4737-3.30:2015 complaint type 2
- $\leq 100\Omega/\text{km}$ - 50V, 1Amp
- Multiple CPR classes available: B_{ca}, C_{ca}, E_{ca}

Scan the QR code to see our full range of Professional Intruder Cables.

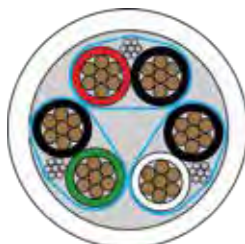

2. CCA Intruder Cables

Low cost alternative to Professional Copper Intruder Cable designed for domestic and small commercial installations.

- Benchmark tested to ensure it is the lowest resistance CCA cable available
- PVC, Low smoke and Fume (LSF) sheathings available
- Available in 6-8 cores
- 7 x Strands copper clad aluminium conductor
- BS4737-3.30:2015 complaint type 3
- $\leq 155\Omega/\text{km}$ - 50V, 1Amp
- CPR class E

Scan the QR code to see our full range of CCA Intruder Cables.

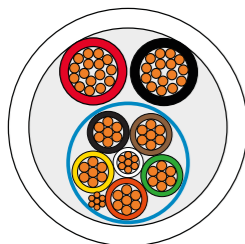

3. Belden Equivalent Cables

Used for security and access control RS-232, RS485 data transfers.

- Certified to EN50575:2014 - CPR305/2011
- Conforms to BS4737-3.30:2015
- Belden Style Data cable sheathed in PE is Type 2
- Belden Style Data cable sheathed in LSZH is Type 1

Scan the QR code to see our full range of Belden Equivalent Cables.

4. Power & Data Cables

For use where a higher than usual current carrying capacity or lower voltage drop is required.

- 7 x 0.182mm² Tinned Copper for data
- 16 x 0.2mm² Tinned Copper for Power
- Certified to EN50575:2014 - CPR 305/2011
- Conforms to BS4737-3.30:2015

Scan the QR code to see our full range of Power & Data Cables.

5. Flame Retardant Cable

Specialist cable designed to resist the spread of fire vertically along the cable.

- 1 x 0.76mm² Tinned Copper
- Certified to EN50575:2014 - CPR 305/2011
- Compliant to IEC 60332-3-2

Scan the QR code to see our full range of Flame Retardant Cables.

LOW SMOKE ZERO HALOGEN CABLES

- High performance cable for specification projects in healthcare, government institutions and high-rise buildings
- Cable emits less toxic substances in case of fire, protecting people and property
- Available in 2 to 12 cores
- Available in screened 6 & 8 cores
- CPR Class CPR class B_{ca} or C_{ca}

Scan the QR code to see more information on the Low Smoke Zero Halogen Cables.

LOW SMOKE AND FUME

- Economy grade CPR cable for non-specified requirements in commercial and residential applications
- Cable emits less toxic substances in case of fire, protecting people and property
- Available in 6 to 12 cores
- CPR Class E_{ca}

Scan the QR code to see more information on the Low Smoke and Fume Cables.

SCREENED CABLES

- Screened cables are designed for use in areas of high electrical interference to prevent false alarms
- Available in both professional intruder copper cable and CCA variants
- Available in 4 to 12 cores & Low Smoke and Fume (LSF)
- For use in both commercial and domestic installations
- CPR class E_{ca}

Scan the QR code to see more information on the Screened Cables.

Mechanical Hardware

The Securefast by CQR range offers a variety of mechanical security mechanisms including padlocks, mortice locks, cylinders, digital locks, and panic hardware.

With a manufacturing history dating back to 1903, our portfolio has continuously evolved to meet the needs of leading door manufacturers and architectural ironmongers over the past 120 years. Our products are rigorously tested and certified to both British and European standards, including performance and fire testing.

As a trusted British brand, we offer a comprehensive range of mechanical hardware that combine quality and ease of installation with a clear understanding of our customers' requirements. Our mechanical digital lock portfolio offers a range of products that balance price, quality, and usability. Our premium SBL700 digital locks come equipped with an easy code change feature that allows users to change the code while the lock remains on the door.

Security cylinders ranging from 1-STAR rated to TS007 and come with a 2-STAR escutcheon for maximum security. A package that provides protection against cylinder bumping, cylinder snapping, and anti-pick features.

As an active member of the Doors and Hardware Federation (DHF) we have representation on the technical and management committees, allowing us to keep us our customers and installers up to date with changes and developments in industry standards, recommendations, or regulations.

Maximum security for minimal effort.

OUR MECHANICAL HARDWARE PRODUCT GROUPS:

1. **MECHANICAL DIGITAL LOCKS**
2. **LOCKCASES**
3. **CYLINDERS**
4. **PANIC HARDWARE**
5. **IRONMONGERY**

Scan the QR code to see our full range of Mechanical Hardware products.

1. Mechanical Digital locks

Digital Locks are typically used in low to medium traffic areas which require a means of restricting casual access without the need for keys, cards or tokens, such as store rooms, workshops, staff rooms and boiler rooms etc.

- Available non-fire rated and fire rated for use on 30 min. and 60 min. timber fire doors
- Fire rated mechanical digital locks are supplied with the intumescent fitted to the latch for easy installation
- Knob and lever handle operated units
- Traditional and easy code change available
- Easy code change available on the SBL700 without removing from the door

2. Lock cases

The UK manufactured range of 5 lever locks are certified to BS3621 as recommended by insurance companies. The high security cylinder mortice locks are built with anti-drill plates for added protection from attack.

For commercial projects Securefast offer a range with 72mm centres which includes panic locks as well as the traditional options for most applications in a building.

- Ranges include, sash, dead, latch, bathroom, night latch and escape locks
- UK manufactured locks include BS3652 Security Locks
- Commercial locks are 72mm centres with a 60mm backset
- Scandinavian locks are available with a Euro profile cylinder, ideal for special needs projects

3. Cylinders

An array of cylinder options are available from a simple 6-pin budget cylinder to high security cylinders and security escutcheons that are tested and certified to the DHF Technical Standard TS007.

- 6-pin cylinders available
- Polished Nickel and Polish Brass finishes
- Single, Double Keyed and Key / Turn cylinders available in the various ranges
- High Security cylinders available tested to TS007 with security escutcheons
- Patent protection cylinders available

4. Panic Hardware

Securefast offer a range of Panic Exit Hardware fully tested and certified to BS EN1125 and operated by a Touch Bar.

The range includes single, two and three point locking with an outside access device. For today's requirements Securefast also offer a range of electrical panic hardware which includes the AEB800 units for use with electro-magnetic locks and controlled access from the outside using an access control proximity reader or key pad.

- Single, two and three point locking available
- Powder coated finish or stainless-steel units available
- Electrical Touch Bar for use with Electro-magnetic locks
- Electrical Latch Retraction units available
- Easy code change available on the SBL700 without removing from the door

Scan the QR code to see our full range of Mechanical Digital locks.

Scan the QR code to see our full range of Lock Cases.

Scan the QR code to see our full range of Cylinders.

Scan the QR code to see our full range of Panic Hardware.

SBL700 MECHANICAL DIGITAL LOCK

- Code change without requirement to remove the unit from the door
- Large easy to operate turn knob
- Performance to EN12209
- Passage function as standard
- Salt spray tested for 240 hours to EN1670

Scan the QR code to see more information on the SBL700.

SED602/VM/SE 2 POINT TOUCHBAR

- 2 point locking with anti-thrust vertical pullmans
- Extensively product tested to 2 million cycles
- Can be cut down to door sizes on site
- Tested push button OAD available

Scan the QR code to see more information on the SED602.

SKSS2 2 1/2" BS 5 LEVER SASH LOCK

- Supplied with box striker
- Suitable for right and left-handed doors
- Insurance approved
- Radius profile on the deadbolt with hardened rollers

Scan the QR code to see more information on the SKSS2.
